

Compatible Computer Checks

PowerChurch Plus offers several pre-defined check styles that you can use within Accounts Payable and Payroll.

A default check format can be chosen in the software by going to the File menu, choosing Preferences and then clicking on Custom Check Layout.

PowerChurch Plus works with [Dynamic Systems](#) to provide preprinted computer checks. We've worked together to guarantee that their checks are compatible with PowerChurch Plus. You can order through their website ([click here](#)), or you can call them directly at (800) 782-2946 or (412) 831-1729.

If you are using an inkjet or laser printer, the following table shows the check styles we support along with the style names as they are listed in PowerChurch Plus.
